Bonds with 90 - Day Notices: Reflects bonds that we mature or are subject to redemption within the next 90 days.

Your Portfolio Holdings: Reflects cash and all securities in your account. Estimated annual income is based on the dividend or income expected to be received annually. **Accrued Interest** represents interest earned but not yet paid or collected on fixed income securities since the last coupon date. There is no guarantee that the interest will be paid by the issuer. **Current Yield** is calculated by dividing the estimated annual income by the market value of the securities and represents an estimated current yield only.

Market Prices/Bond Ratings.

The market value of your holdings are as of the last business day of the statement period. Prices for determining market values represent estimates. These estimates are obtained from multiple sources, including Bear Stearns, its affiliates and outside services. Pricing estimates may be based on bid prices within the bid/offer spread, closing prices or market methodology that uses data relating to other securities whose prices are more ascertainable to produce a hypothetical price based on the estimated yield spread relationship between the securities. Pricing estimates do not constitute bids for any securities. Actual prices realized at sale may be more or less than those shown on your statement. Bond ratings are received from outside sources. While we believe our sources for market values and bond ratings to be reliable, we cannot guarantee their accuracy.

The total cost basis for each security position and the unrealized gains are provided solely as a general indication of performance and should not be used for tax purposes or otherwise relied upon without the assistance of your tax advisor. With respect to security positions received into your account, cost basis information, if any, has been provided by you.
